The LED Wall Fixture is an exceptional lighting solution designed for both functionality and aesthetics, making it ideal for outdoor spaces. Featuring a built-in photocell sensor, this fixture automatically adjusts its brightness based on ambient light, ensuring optimal energy efficiency. With a power output of 24W, it delivers an impressive 2000 lumens of illumination, providing ample brightness for any setting. The fixture boasts 5CCT selectable options, allowing users to choose their preferred color temperature for a customizable ambiance. Rated IP65, it is specifically engineered for wet locations, offering durability and reliability against the elements. Perfect for enhancing the beauty of gardens, corridors, patios, balconies, villas, walkways, and pillars, this LED Wall Fixture combines style with practicality, making outdoor decorating both effortless and elegant.
